

TRANSPARENT LED DISPLAY

Transparent led display is new design product which mainly use for large building glass curtain wall and chain shop showcase. More than 80% transparency and no need any steel structure to fix the led display panel is amazing advantage for some buildings. This glass led display is energy-saving and very harmonious with city beautified project.

Transparency: More than 80% transparency ensure good daylight function of glass wall. Almost no exist of leds from far away.

Convenience: no need any structure to fix the led display, it can hang on top of the wall, or stick onto the glass wall with special glue, no dirty points, and 10mins solidification.

No need heat dissipation/cooling system because it is installed inside. Totally noiselessness.

Wide application: Anywhere with glass wall or showcase, like bank, chain shops, opera, shopping \ mall, etc.
